Animal Care Tech

The Company

Noble Life Sciences (Woodbine, MD) is a contract research organization (CRO) providing services in the fields of preclinical drug, vaccine and medical device development, from product discovery to GLP- compliant studies for regulatory submissions.

The company offers integrated *in vitro* and *in vivo* services, including cellular and animal disease model development and experimental design, non-GLP and GLP efficacy, toxicity, biodistribution and product release studies in both small and large animals, and vivarium services. The company also offers custom polyclonal antibody production services, as well as research animal tissue and sourcing.

The Noble facility includes 24,000 sq. ft. of SPF animal housing and support space, with conditioned indoor housing for large animals, five acres of fenced outdoor housing for large animals, two fully equipped surgical suites, a necropsy suite and a sample processing lab. The facility includes ABSL-2+ and BSL-2 capabilities, an automated security system, automated equipment and HVAC monitoring systems and a 100% back-up generator.

NLS is AAALACi accredited, USDA licensed, OLAW compliant, FDA inspected and successfully audited by numerous clients.

The Position

The **Animal Care Tech** – is a key position within the organization with significant prospects for career growth as the company continues to increase the breadth and scope of its business. This position reports directly to the Vivarium Manager.

Responsibilities include but are not limited to:

- Read, understand and follow all SOP's, Quality Assurance Standards and perform duties in accordance with the study protocol
- Monitor daily animal health and wellness checks and report any abnormal animal conditions to the supervisor and/or the Study Director and record observations in appropriate logs
- Ensure that all animals are fed the proper diet and have adequate water within the date and time requirements.
- Clean and disinfect animal holding rooms daily.
- Assist Study Director with the performance of animal related procedures, as needed.
- Maintain room written records and environmental logs.
- Clean and sanitize animal rooms, clean halls, laboratory, necropsy area and dirty halls.
- Work effectively as a team member
- Perform miscellaneous duties as assigned.
